Welded PERFO LINEA mesh provides a safe and inconspicuous protection in lookout towers, staircases, bridges or dividing spaces. Welded mesh is stronger and offers a better material distribution in reinforcing cross-sections, as well as short anchor length. The mesh is manufactured on the basis of resistance welding with different options for hole spacing and wire diameter.

Smallest mesh: from 20 x 20 mm – 50 x 50 mm and made to order

Wire strength: from \varnothing 2 mm to \varnothing 6 mm

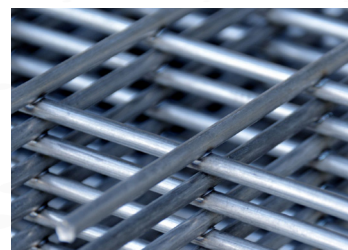

Material: steel gr. 11, semi-hard wire
